Product Overview

LGS2000-F-8GE8GF-M is a full Gigabit Ethernet switch, not only providing 8 Gigabit Ethernet ports for upgrading the existing network infrastructure, but also providing 8 Fiber ports for various applications such as new energy or surveillance with better redundancy. A full Gigabit network provides a higher bandwidth than the legacy Fast Ethernet network and reduces the response time for time-sensitive applications. With the powerful features, LGS2000-F series managed switches can easily to prioritize, partition and organize the network to provide reliable and high-quality services.
